DETAILED ACTION

The examiner is in receipt of applicant's response to office action mailed 3/3/2004, which was received 8/9/2004. Acknowledgement is made to the cancellation of claims 1,8,15 and 22, the amendment to claims 2-7,9-14,16-21 and 23-28 along with the addition of claims 29-39, leaving claims 2-7,9-14,16-21 and 23-39 as pending in the instant application. The amendment has been carefully reviewed and it was noted that the amendment caused new inventions to be added to the invention as originally presented, therefore a restriction requirement provided below is deemed appropriate.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 2-7,9-14,16-21,23-28,29-34, drawn to method, system and computer program product for comparing product utilizing a series of computers, classified in class 705, subclass 27.
- II. Claim35 and 36, drawn to means for comparing products, classified in class 705, subclass 27.
- III. Claims 37-39, drawn to a system to compare multiple product configurations, classified in class 705, subclass 27.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such

as "means for" which may include processes done by hand that are found in the specification. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter; restriction for examination purposes as indicated is proper.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as communicating with a web site. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group IA – 2-7,9-14,16-21,23-28,29,31 and 33

Group IB – 29-30,31-32,33 and 34

Group IIIA – 37 and 39

Group IIIB – 37 and 38

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 29,31 and 33 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 09/760,062

Art Unit: 3625

Conclusion

Page 5

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Mark Fadok** whose telephone number is **(703) 605-4252**. The examiner can normally be reached Monday thru Thursday 8:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wynn Coggins can be reached on (703) 308-1344.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Receptionist** whose telephone number is **(703) 308-1113**.

Any response to this action should be mailed to:

Commissioner for Patents

P.O. Box 1450

Alexandria, Va. 22313-1450

or faxed to:

(703) 872-9306

[Official communications; including

After Final communications labeled

"Box AF"]

(703) 746-7206 [Informal/Draft communications, labeled

"PROPOSED" or "DRAFT"]

Hand delivered responses should be brought to Crystal Park 5, 2451 Crystal Drive, Arlington, VA, 7th floor receptionist.
